

VIRTUAL FELLOW EDUCATION DAY

The Fellow Education Day addresses health and quality-of-life issues for individuals whose fertility may be impacted by cancer treatment, differences in sexual development, or gender dysphoria. The course is targeted towards trainees in Reproductive Endocrinology & Infertility, Pediatric Gynecology, Male Infertility, Pediatric & Adult Oncology, Pediatric Endocrinology, Surgical Oncology, & Radiation Oncology.

The course includes short lectures interspersed with complex clinical cases reviewed in interdisciplinary teams prior to moderated group discussion. Participants will be provided materials to review prior to the course in order to facilitate an “flipped classroom” approach. This year’s course will be held *virtually on Zoom* using breakout rooms and polling to facilitate an interactive learning environment.

November 9, 2021, 9:00am–4:30pm EST

Registration is FREE and closes October 1, 2021
