

Oncofertility 101 Course

November 11, 2024, 8 a.m.-Noon

Providers: Understand and expand fertility options for young cancer patients
Virtual or Detroit Marriott Renaissance Center

This year, the 16th Annual Conference of the Oncofertility Consortium, November 11-13, 2024, will be hosted by Henry Ford Health + Michigan State University Health Sciences at Detroit Marriott Renaissance Center. To spread awareness about oncofertility among health care providers, we designed this special Oncofertility 101 Course on the first day of the conference.

Explore the intersection of oncology and reproductive medicine

Oncofertility is a relatively new interdisciplinary field that expands fertility options for young cancer patients. The purpose of the Oncofertility 101 Course is to introduce oncofertility and model a team approach to fertility preservation care and counseling. Short, didactic lectures by leaders in the field will be interspersed with complex clinical cases for health care providers.
