

## You're Invited!

### Pediatric and Adolescent Oncofertility Subcommittee Webinar

#### First Quarterly Webinar of 2026

Join us for a discussion of complex cases in oncofertility.

#### Date and Time

**February 12, 2026**

**9:00 AM PST / 12:00 PM EST**

#### Topics for Discussion

- **Genitourinary sarcoma in a Prepubertal Patient:** Should we offer to remove the only existing healthy tissue (the remaining ovary or testicular tissue) in order to undergo fertility preservation in a high risk patient?
- **Prepubertal Leukemia Patient Undergoing Active Therapy:** Should we offer tissue freezing when someone can potentially have cancer cells contaminating the tissue and reimplantation may not be an option in the future?

#### Our Panelists

Name	Speciality
Lisa Campo-Engelstein	Medical Ethicist
James Klosky	Psychology
Kelsey Balmelli	Navigation
James Smith	Urology
Nick Yeager	Oncology
Madeline Ross	Pediatric Adolescent Gynecology
Monica M. Laronda, Ph.D.	Developmental Biologist

**Moderators:** Vanisha Patel and Allison Close
